--	-------

- 25X1X
1. At 11:30 a.m. on 20 April 1952, aircraft observed at Doeberitz airfield included 40 to 50 IL-10s on the northern edge and 16 IL-10s in front of the closed hangars on the southern edge.
- 25X1C
2. Between 10:40 and 11:10 a.m. on 2 May, about 35 IL-10s were parked on the northern edge and 13 IL-10s, in front of the hangars on the southern edge of the field. There was no flying although the weather was good. All aircraft on the northern edge had a red stripe on the leading edge of their rudder assemblies. Six to eight containers, each 3 meters long and about 1.7 meters in diameter, were observed in the fuel dump. Four AA guns, probably of 37-mm caliber, were located in the southwestern section of the field. (1) Next to the guns there were 6 trucks, 15 tents and about 30 soldiers whose service color could not be identified.
- 25X1X
3. Between 4 and 5:50 p.m. on 28 April, 45 to 50 IL-10s were parked on the northern edge of the field and 15 IL-10s, in front of the closed hangars on the northern edge. A Soviet soldier painted a white rim around the Soviet star on the rudder assemblies of the IL-10s parked on the northern edge of the field. There was no flying although the weather was favorable. The aircraft crates were still at the same place as previously. (2) On the southwestern edge of the field about 50 soldiers were digging five large holes, 25 to 30 meters apart. (1)
4. Between 4 and 5:30 p.m. on 5 May, there was no flying. A thunderstorm was gathering. Forty-five IL-10s were counted on the northern edge of the field. All planes parked on the northern edge of the field had a red stripe on the leading edge of their rudder assemblies, except for the westernmost plane which had no number but a red trailing edge on its rudder assembly. (3) Twenty-one IL-10s were parked in front of the hangars on the southern edge. Five AA guns were emplaced on the southwestern edge of the field. Some soldiers wearing red-bordered black epaulets excavated a sixth gun emplacement. A gun mounted on the chassis stood nearby. (1) A wire extended from the AA gun emplacement to the flight control station.

the fire power of AAA units.

- 25X1 (2) [redacted] the 40 to 50 crates which were observed for the first time on 21 April contained new IL-10s.
- (3) The aircraft of one ground attack regiment, which are parked on the northern edge of the field, are marked by red leading edges on their rudder assemblies.
- (4) This information supports a previous assumption that the aircraft parked on the eastern edge actually belong to the ground attack regiment located on the southern edge of the field.
